CHRISTIAN KURT CAMBONGA

AI Solutions Specialist / Multimedia Designer

@ kurtcambonga8@gmail.com

SKILLS

Web Development

Automation & Workflows

IoT & Tech Applications

Data Handling

Multimedia Designer

Tools Used

n8n   GoHighLevel (GHL)

Webflow   WordPress   Wix

Squarespace   Canva

Photoshop   CapCut   APIs

Zapier   Figma   GH Suite

node.js   Sass   Tailwind

Three.js

MY PROJECTS

Research in AI & IoT for Agriculture (Academic Exploration)

📅 2025

- Investigated the application of drones and AI-based image analysis for precision crop management.
- Proposed automation workflows for monitoring crop health, predicting yields, and optimizing agricultural inputs.

SUMMARY

Adaptable and innovative Computer Science student with a growing specialization in AI-driven solutions and workflow automation. Skilled in programming (HTML, CSS, Java, C, C++), n8n automation, API integrations, and custom scripting to create practical, data-powered tools. Experienced in conceptualizing and developing AI-assisted applications, including budget-friendly meal planners and workflow agents, with a focus on user needs and efficiency. Strong problem-solving abilities, rapid learning capability, and a passion for applying emerging technologies to deliver impactful, real-world solutions.

EXPERIENCE

Web & Systems Development   📅 2023 - 2025

- Built and styled responsive web pages using HTML, CSS, and JavaScript, incorporating modular design for maintainability.
- Developed automation scripts in C and C++ for data handling, workflow optimization, and utility tasks.
- Prototyped marketing funnels and lightweight applications using drag-and-drop builders with integrated AI tools.

Creative Product & Brand Development   📅 2023 - 2025

- Designed brand identity and packaging concept for a protein powder product, integrating symbolic and minimalist visual design elements.
- Applied AI-assisted design tools to accelerate prototyping and iterate on branding concepts.
- Researched market positioning and product differentiation strategies for small-scale consumer goods.
- Created marketing mockups and content concepts to align product image with target audience preferences.

AI Workflow Developer (n8n, Zapier, Make)   📅 2024 - Present

- Designed and deployed AI-powered automation workflows using n8n, integrating voice agents, lead tracking, and real-time Google Sheets data updates.
- Implemented API connections and output parsers to automate scheduling, reporting, and customer engagement processes.
- Experimented with Telegram bot integrations to enable interactive, AI-assisted communication tools.

EDUCATION

Bachelor of Science in Computer Science

Caraga State University   📅 Present

MY PASSIONS

🤖 Leveraging AI and automation to design practical, real-world solutions

🖥 Creating user-focused applications that improve efficiency and accessibility

MY PROJECTS

AI Application Concept Creator – PinoyTimpla Meal Planner (Academic Exploration)

📅 2024

- Developed the concept for an AI-assisted meal planning application capable of adapting recipes based on user feedback (e.g., taste, saltiness, portion size).
- Designed system logic for dynamic recipe adjustments, budget tracking, and culturally relevant recommendations.
- Created branding and UI/UX concepts optimized for accessibility and affordability.

MY PASSIONS

Exploring no-code and low-code platforms to rapidly prototype ideas

Developing branding and product concepts with strong storytelling
